

Conserved Lands Focus Areas (SOOE Extended)

Methods and Data Sources

The general conservation lands database was queried to identify the intersection of the conservation lands data and conservation focus areas data within the Piscataqua Region watershed. The most recent dataset of conservation lands from NH GRANIT was the primary data source for this indicator. Conservation focus area boundaries from Steckler and Ormiston (2021) and the analysis of the data for this indicator were provided by The Nature Conservancy in New Hampshire.

Additional information regarding the development of the updated conservation focus areas and additional methods can be found in the 2021 New Hampshire's Coastal Watershed Conservation Plan at connect-protect.org/the-plan/

Data Sources

The Nature Conservancy in New Hampshire, the Maine Office of GIS, and NH GRANIT provided conserved lands data for this indicator.

Additional Data, Tables, and Graphs

Table 6.1: Total acreage and percentage of Conservation Focus Areas protected among the 52 communities of the Piscataqua Region Watershed.

Town	State	CFA Acreage	Protected CFA Acreage	% CFA Protected
<i>Acton</i>	ME	6,629	306	5
<i>Barrington</i>	NH	13,206	5,153	39
<i>Berwick</i>	ME	5,793	485	8
<i>Brentwood</i>	NH	3,555	1,684	47
<i>Brookfield</i>	NH	7,208	2,066	29
<i>Candia</i>	NH	2,700	451	17
<i>Chester</i>	NH	4,599	832	18
<i>Danville</i>	NH	968	137	14
<i>Deerfield</i>	NH	16,291	4,373	27
<i>Dover</i>	NH	3,093	1,597	52
<i>Durham</i>	NH	8,236	4,074	49
<i>East Kingston</i>	NH	1,129	295	26
<i>Eliot</i>	ME	968	177	18
<i>Epping</i>	NH	7,587	4,026	53
